

GAUGE ISOLATOR VALVE

(MODEL: GISSPR) SINGLE STATION

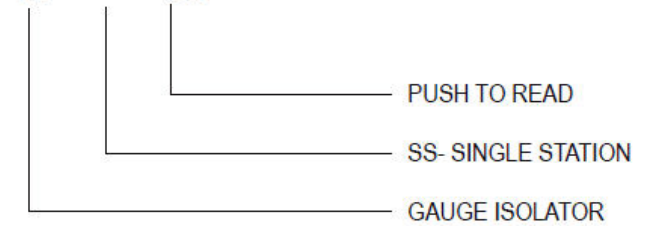

- 3000 PSI working pressure.
- All ports are ¼" BSP.
- Working temperature ranges from -30°F to 240°F.
- A guarantee of below 5 CC/min drain leakage in a new valve.
- The Gauge Isolator Valves protect the pressure gauge from damaging pressure surges, hydraulic shock and mechanical vibrations.
- Outer body is made of High Grade Casting.
- The fluid is completely isolated from the gauge until the knob is pressed. By pressing the knob, the fluid is connected directly to the gauge port giving instant and accurate readings on the gauge.
